Letter of Recommendation to whom it may concern

Dear Concern,

China Akther has been a part of our Endgame Program for the past 2 months.

During this time, she worked on the **Dash Chat** project with the **Quantum Coders** team and showed great performance, even under pressure. Her technical and communication skills are impressive, and she is both curious and dedicated.

We strongly recommend her for any opportunity in the web development field.

Through the project, she gained experience in different web development activities and proved that she can handle new challenges very well. She is a talented and hardworking individual, and we wish her all the best in her future career.

If you need any additional information, please contact us at jobs@programming-hero.com.

Best regards,
